Welcome to the Dakota Xpress annual production sale. We would like to thank you for your past interest and support of our programs and looking forward to working together in the future. The Dakota Xpress sale is made up of two family working ranches, the Staigle and Hansen ranches are family run with each ranch being an individual entity which are approximately 80 miles apart. The breeding philosophies of the two ranches are very similar to each other in type and kind of cattle.

Dakota Xpress cows must meet the expectation of fleshing ability, calve on their own, good feet and leg structure, gentle disposition, quality udder traits and be fertile. With this criterion they will produce offspring that will add profitability to your bottom line.

The bulls have been 100K DNA tested for parentage, coat color, dilution gene, and polled status, with the most current genetic evaluation to provide higher genetic accuracy. Current yearling info, yearling weight, testicle measurements and scan data will be provided on sale day as well as on our website www.dakotaxpress.com and www.dvauction.com

The vaccination programs are consistent between both ranches. We vaccinate the baby calves with C & D at birth. At branding time in May, Vista Once and 7 Way were given. Three weeks prior to weaning another round of Vista Once and 7 Way with somnus was given. The calves are boosted at weaning and poured with Clean Up. The bulls are weaned early Oct and put on a high roughage ration and set up to gain at a rate of 3.5 lbs. per day. This TMR ration is a home grown, balanced ration that we have fed for many years to develop the bulls. This ration helps ensure the development, growth, and longevity of each bull. The culling process is ongoing right up to the day of the sale, looking at the bull's performance, testicle development and disposition! Development of the bulls is especially important to us so they can continue to breed cows, maintain condition, and continue to develop into a mature sire.

The bred heifers are selected to be developed either in our program or yours. They have been ultrasounded for pregnancy with calving dates and calf sex is determined if old enough at ultrasound date. The heifers have been DNA tested for parentage, coat color, dilution gene, and polled status. Many heifers are AI bred and have been vaccinated with the same protocol as our replacement heifers, with Virashield 6 VL5-HB, ScourBoss or Guardian and poured with CleanUp.

The Staigle and Hansen ranches welcome you to view the sale offering at the individual ranches any time prior to the sale until February 12th when they will be moved to Kist Livestock in Mandan until sale day. The video of the bulls and heifers can be viewed on DV auction.

The sale will be broadcasted on www.dvauction.com the day of the sale. If you are unable to attend, please contact one of us or one of the sales personnel to make prior arrangements to purchase the cattle you are interested in. Stay updated on our website www.dakotaxpress.com for future data.

With the size of our offering, we have many options to meet your needs whether it be calving ease, color, performance, etc. and the #1, maternal! We look forward to seeing you at the sale, new and repeat customers! Thank you for your interest in our program!

Accommodations

Sale Headquarters:

Baymont Inn & Suites (Seven Seas) • (800) 597-7327
 (A block of rooms is reserved, under Dakota Xpress, at the above location until Feb. 10, 2024)

Ramkota Hotel.....(701) 258-7700

Bismarck is served by Northwest Airlines as well as United Airlines, and has excellent facilities for light aircrafts.

**Carcass data, yearling weights and scrotal measurements
 will be available the week of Feb. 12, 2024.
 Look for it online at: www.DakotaXpress.com**

Catalog and ads designed by
Strammen Livestock Services, Solen, ND • 701-290-3886

Directions to Dakota Xpress partners' ranches

The bulls are developed at each individual ranch. Dakota XPress extends a invitation to visit each individual ranch for a viewing of both the bull and female consignments.

• Directions to Mandan Lake Simmental Ranch (MLC):

- From Center: go 5 miles east, 6 miles north, 1 1/4 miles east.

• Directions to Hansen Simmental Ranch (HSR):

- From U.S. Highway 83, turn west onto Highway 23. Go west 13 miles. At 184th Street, turn north 3 miles and then west 2 miles.

Videos of all of the lots are available online at
www.DVAuction.com/DakotaXpress.com

Important Notes

- All cattle sell under the standard terms and conditions of the American Simmental Association. The full document will be available in the office on sale day. Terms of the sale are cash.
- A Volume Discount of three percent (3%) off of the purchase price of three or more bulls is offered.
- A feeding and delivery contract can be made with Dakota Xpress in the office sale day. Bull delivery will start around the 1st of May with arrangements for delivery made at that time. For more information, contact Wade or Kevin
- A supplement sheet containing carcass, scrotal and average daily gain information will be available sale day. EPD's may change between catalog print date and the date registration papers are received.
- A customer appreciation lunch is served sale day, with a Buyer's Appreciation Supper after the sale.
- All bulls are DNA tested for parentage, coat color and Polled traits.
- 100% of each bull sells, including possession and semen interest. We will reserve the right to collect 100 units of semen on any bull for in-herd use only. This will be done at the sellers' expense and the buyers' convenience.

HOW DOES A GENOMIC TEST BENEFIT OUR CUSTOMERS?

More accurate EPD - Genomic testing is a way to add information to what is known about an animal's genetic potential even before they have progeny of their own. The commitment to add a genomic test to the genetic predictions enables our customers to have higher-accuracy EPD when they make their buying decisions. One way to think of the information gained is by asking how many progeny would this animal need to provide a similar increase in the accuracy of the EPD for that trait? These are referred to as progeny equivalents. Below is a table of current progeny equivalents. Adding a genomics test is like adding over 25 calving ease records or 22 birth weights on progeny to the EPD. As you can see for some of these traits, a genomically-enhanced EPD is like knowing an entire calf-crop worth of information for bulls or a lifetime of calves for females.

TRAIT	PROGENY	TRAIT	PROGENY
Calving ease	25+	Stayability	15
Maternal calving ease	4	Carcass weight	6
Birth weight	22	Marbling	10
Weaning weight	25+	Ribeye area	8
Yearling weight	25+	Back fat	11
		Docility	25+

Confidence in the pedigree - Each genomic test includes parentage markers to both confirm the animal's own pedigree (if his parents' DNA markers are available) and for future parent verification of their own calves. By testing the DNA for parentage, you can be sure the pedigree is correct.

YOUR SUCCESS IS OUR SUCCESS. WE TAKE OUR JOB *SERIOUSLY*.

ASA
DNA

**All bulls were tested through the
American Simmental Association
utilizing the 100K DNA Test**

*The 100K DNA testing provides a higher
accuracy of genomic enhanced EPD's.*

With this test all bulls will have:

- Parent verification
- Coat color
- Homo Polled tested
- Genomic enhanced EPD's

Cells shaded in gold indicate traits in which Dakota XPress bulls match or EXCEED the national average.

EPDs change weekly with the new BOLT program running.

THE VALUE OF NUTRITION AND THE POWER OF YOUR NEXT BULL PURCHASE

The proper care, feeding and management of a young sire will insure that you will be happy with the return on investment. By managing yearling bulls properly, your investment will return dividends for many years down the road. Dakota Xpress takes pride in the development of our bulls. Our bulls are feed a high roughage ration consisting of corn silage, chopped hay, corn, corn distillers, and a mineral and vitamin package. The TMR bull ration is fed to develop frame, muscle, and scrotal development without fattening the bulls. This ration has worked well to alleviate problems with fertility, feet and leg problems, and to ensure the longevity of the bulls.

At Dakota XPress the fertility of the herd bull is even more important than its growth performance. So in addition to protein and energy, we make sure that the rations contain an adequate trace mineral package. Therefore the mineral package contains chelated zinc, copper, manganese, and organic selenium to enhance reproductive performance. The cow herd also receives a mineral package to enhance their reproductive performance as well.

Dakota XPress understands the investment you are making in these young herd sires. We would like to help you develop the bulls after the sale through our feeding, fertility testing and delivery program. Details are available at the sale or any time prior to sale day by contacting Wade or Kevin.

Color & Polled Guide

Homo Black - All calves will be black if mated to a black or non-dilutor red cow.

Hetero Black - If mated to a non-dilutor red cow ½ the calves will be black and ½ will be red.

Homo Polled - All calves will be Polled.

Hetero Polled - If mated to a horned cow ½ of the calves will be Polled and ½ will be horned.

Non-Dilutor - If mated to a Hetero black cow, ½ the calves will be black and ½ will be red. If mated to a Homo black cow, all calves will be black.

Dilutor - If mated to black cow, you might get a grey calf.

BIRTH WEIGHT & CALVING EASE

University studies in Wyoming and data from Montana and Colorado lend credence to the following conclusions:

- 1) The birth weight itself influences calving ease by 65%.
- 2) The female has a 60-70% influence on birth weight of her calf.
- 3) The bull has 30-40% influence on the birth weight of his progeny.
- 4) Pelvic measurement and angle, as well as the shape of the calf have 35-40% influence on calving ease
- 5) Length of gestation greatly affects birth weight. A fetus can gain more than one pound per day in the last days of gestation.
- 6) Weather and temperature the last 30 day affect the length of gestation.
- 7) Size and maturity of the cow influence calving ease.

Most commercial producers do not take birth weights. Guessing is as inaccurate as driving with a broken speedometer - what's thought to be 55 mph may in fact be 65 or 70 mph, and what's thought to be 70-80 lbs may actually be 80-90 lbs.

Remember, everything is relevant, increased growth, frame and performance will increase BW. A longer-bodied calf will weigh more. If a calf is expected to have genetics for growth, it will display this prior to birth as well as after. As a rule of thumb, it takes a calf weighing 85 lbs at birth to finish at 1200-1250 lbs. A cow should easily give birth to a calf weighing 8% of her own body weight. Thus, a 1,200 lbs cow should give birth to a 96 lb calf with ease.

Continued selection for light birth weights will ultimately reduce the mature sizes and performance of your cattle.

ALLOWING YOU ACCESS...

All value creation starts with great genetics and every genetic purchase must provide the potential to enhance profitability to this industry. With the expansion of our genetic improvement and customer service opportunities, the Allied mission continuously improves and moves closer to its goal of making our customers more successful and the beef business a more profitable and thus sustainable industry for the future.

You can count on genetics purchased from Allied partners to be the very best in this business, backed by a growing family of Allied service offerings to back that value proposition.

Allied Feeding Partners, LLC and Feeder Cattle Marketing: Cattle generated by Allied owner's customers just have more genetic potential to create profit and we are committed to proving it. Contact Clint Berry 417-844-1009 at Allied Feeding Partners for more information on how to participate in AFP or take advantage of Allied's growing feeder cattle marketing services and value creation opportunities.

All Beef, LLC and Allied Semen and Genetics: Check out our Allied Sire Directory and our industry partner offerings of All Beef sires. Simply the most comprehensive and commercial focused line-up of SimGenetics available. See too our growing list of prime Red Angus and Angus options. Rocky Forseth 406-590-7984

Data Genie: Fast, efficient data services from an experienced data manager can be among the most difficult to access in this business. Talk to Leoma Wells 559-696-4941 about her options for proven information services.

Allied Seedstock Marketing: Corey Wilkins 256-590-2487, Julie Murnin and rest of the genetics marketing team provide the most professional and customer focuses seedstock marketing options available, all backed by the growing list of Allied commercial customer service options.

RightMate, RightChoice and Future Focus Genetic Planning: New and game changing genomic technology powered by Top Genomics LLC combined with experienced consulting to get the most from these options and your genetic investment. The future will demand better genetics, so let's make a plan. Contact Marty Ropp 406-581-7835 for great opportunities.

At the core of the Allied family of businesses is access to the very best genetics and customer service in the beef industry. Becoming full service genetic providers has always been our goal, because it's always been important.
